

## DIGITAL SIGN CONTROLLER

Blaze is a digital sign controller that offers unprecedented simplicity in managing the video content and graphics of fascia boards or LED displays. Create segmented displays which can independently show uncompressed videos, graphic overlays and real-time statistics.

Plus, you can easily customize your own content. So, say goodbye to boring fascia boards. With Blaze, you can instantly manage your own in-game entertainment. All at the touch of a few buttons.

## FEATURES & BENEFITS

- » Display uncompressed video for the highest quality
- » Extremely user-friendly interface
- » Quickly overlay graphics and stats to any segment of the display
- » Send video and graphics to multiple displays at the same time
- » Synchronize all Click Effects systems using Click Effects Network protocol
- » One operator can trigger content simultaneously on all displays
- » Quickly identify media with custom thumbnail images
- » Industry-standard outputs capable of integration with virtually any display

#	PLAYER	PTS	FLS	BULLS	QTR	ROCKETS	#	PLAYER	PTS	FLS
31	JAMES	12	1		2	40	11	MING	10	1
12	HINRICH	8	0	51	04:39		7	LOWRY	5	0
9	DENG	9	0				12	MARTIN	3	1
32	BROWN	2	1				3	ARMSTRONG	2	1
20	ALEXANDER	4	0				20	JEFFERIES	8	0

**Available with a fully redundant backup option. Seamlessly back up one or more systems.**
